About Me

I'm a Full-Stack Engineer with experience building modern web applications in Agile teams. I've worked with multiple clients and have a background in software development, databases, system administration, data analytics, and QA. These days, I'm focused on expanding my expertise in AI automation and AI engineering while building solutions that make an impact.

Skills

- Web Application Development
- Mobile Application Development
- Software Development
- Augmented Reality (AR) Development
- Machine Learning
- Emerging Technologies
- Data Management
- System Administration
- Quality Assurance (QA)
- Prototyping
- Web Design & UI/UX Design

Language

- English
- Filipino

Education

Bachelor of Information Technology

2021-2025

Saint Louis University, Baguio City, Benguet Philippines

Notable Projects:

- ARventure- is an Augmented Reality Indoor Navigation Mobile Application that helps users navigate through a building or a place using augmented reality technology even in an offline set-up.
- Aldrin Stream- is a Web Application Client-Server live streaming system with queuing functionality inspired from OBS studios.
- Wordy- is a gaming software in which you can play a word competition game, where you can compete with other players in acquiring the longest word possible from a given set of letter.
- iSakay- is a client-server transportation ticketing web application that enables users to conveniently book rides with jeepney drivers by selecting their preferred travel schedules and reserving specific seats.
- Cryptopredictor- is a machine learning-powered tool that predicts cryptocurrency price movements using market data to support informed investment decisions.

Experience

NOAH Business Application (University Internship)

JAN-APR 2025

Quality Assurance Analyst and Business Application Developer

- Ensures that the features or elements within the system/project meets the company standards.
- Careful testing of System Features.
- Bug finding.
- Identifying issues and documenting.
- Maintaining consistency across all outputs.

PRAXXYS Solutions

NOV 2025-JUN 2026

Junior Front-End Developer

- Working in an Agile/Fast Phased development environment.
- Developing user interfaces and performance exactly the same from the design using technologies and frameworks such as Vue, Nuxt, Ionic, Flutter, Typescript, Tailwind, and Laravel PHP.
- Bug finding and Quality Assurance.
- Coding Standards.
- Maintaining consistency and efficiency across all outputs.
- Backend API Integration.
- Client Demonstration
- Mobile and Web Development
- AI Research and Innovation

Technology Stack

HTML, CSS, Javascript, PHP, Node JS, Wordpress, Joomla, Laravel, Nuxt, Flutter, Ionic, Vue, Tailwind, Typescript, C, C++, C#, Java, Python, Kotlin, Luau, Unity, Android Studio, MySQL, Figma, Canva, Bootstrap, Git, GitHub, GitLab
